

**argenta<sup>®</sup> Magnotica<sup>®</sup>**

The Magnotica is a magnetic & contactless door closer which holds interior doors shut without the need for a door handle or latch.

Because there are no moving parts, the door can be opened and closed completely noiselessly.

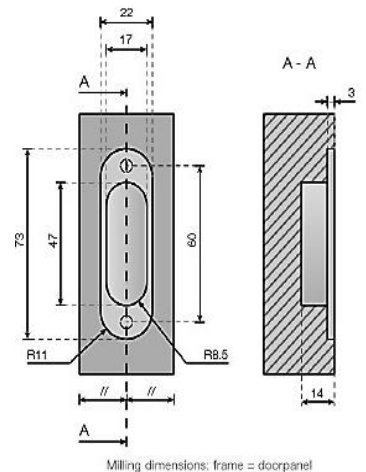

The Magnotica can be installed on any normal wooden door frame and because the door is quick and easy to open without a need for a door handle, this magnetic closure is particularly suitable for doors to walk-in closets, ensuites, pantries and storerooms.

The Magnotica is ideal to be used with the Pivotica door pivot hinges and can be installed vertically (on the front edge of the door, preferred) or horizontally at the top of the door.

**Magnotica Features**

- No moving parts
- Door can be closed without noise
